## Section 1: SCHOOL PROFILE

The American English Academy (AEA) is a private coeducational international school which offers a full U.S. educational program from pre-kindergarten (age 3) through Grade 12. Based on international Best Practices and accreditation requirements, the school's curriculum follows the U.S. Common Core Educational Standards. The learning program is in English language, student-centered, and includes a wide range of after-school activities and sports. The school year starts on September 15 and ends on June 30.

Through its adjunct Abraham Lincoln School, licensed by the Bulgarian Ministry of Education, AEA offers an optional Dual Language Program which is developed for the specific requirements of local students. The Dual Language Program meets the national educational standards and it is available for students from the age of 5 to Grade 12.

The American English Academy is fully accredited by U.S. Middle States Association – Commission on Elementary and Secondary Schools (MSA-CES).

AEA is an independent, secular, private school without affiliation to any religious, political or interest group.

## Section 2: ADMISSIONS CONCEPT

The American English Academy operates a selective admissions policy and welcomes applications from students who have demonstrated high motivation, good command of the English language, excellent social skills, and eagerness to learn. American English Academy expects parents and/or guardians to show respect and concern for others by their attitude towards the admission procedure and further as part of the school's community.

All applicants for Grades 1-12 are subject to further evaluation which includes an entrance interview, an English language skills assessment, and accordingly to the individual case – a general placement test.

Admissions to the American English Academy are based on the capacity of the school to meet the educational needs of the applicant, and the potential of the applicant to benefit from the education provided. In addition to the above, all applications are further evaluated in consideration of language support, special needs, class size and demographics. All admissions are subject to availability, and in case their designated grade-level is full, students may be included in the wait pool upon parents' request.

Priority of admission is given to applicants in the following order: *children with siblings currently studying at AEA; children who have been studying in other international schools; children of parents with international citizenship; children of parents with Bulgarian citizenship.*

### Section 3: ADMISSIONS TIMELINE

American English Academy accepts students throughout the entire school year, provided that there is available placement in the respective grade level. All applications are reviewed on individual basis when submitted and there is no deadline for application. After being carefully evaluated, new applications will receive either 'approved', 'rejected', or 'continued for further assessment' status. Approved candidates are enrolled and registered at AEA only after an Agreement for educational services is signed between the school and student's parent/representative. The complete 'application to enrollment' process usually requires about ten to fifteen days, provided all the application documents are submitted within the given time frame and no further assessment of the applicant is required.

Approved applicants are admitted to the school based on the chronological order of their application submission, acceptance, and registration. Therefore, we strongly advise interested parents to submit an admission application at their earliest conveniences in order to secure placement in the desired grade level.

### Section 4: STUDENT DEMOGRAPHICS

The student body of the American English Academy incorporates children from about 40 different countries. Cultural diversity is one of the most distinguishing features of AEA and the school aims to maintain a balanced mix between international and Bulgarian students. In order to provide enriched international experience and active intercultural exchange, AEA maintains an approximately equal ratio between international and local students. In this environment our international students gain a better perspective and appreciation of the local culture, while in the same time our students from Bulgaria benefit from the enriched international diversity.

### Section 5: GENERAL PLACEMENT

New students are placed in a specific grade level based on their previous educational experience, and their age. Thus, for example, a student who has completed 3<sup>rd</sup> grade in a previous school most probably will be admitted to 4<sup>th</sup> grade at AEA. Applicants' assessment results provide additional guidelines in regard to students' most adequate placement. The following table illustrates the AEA general placement age requirements as of academic year 2021-22.

Level	Applicant's Year of Birth	Class Size	Level	Applicant's Year of Birth	Class Size	Level	Applicant's Year of Birth	Class Size
K3	2018	10	Grade 3	2013/2012	20/40	Grade 9	2007/2006	20

Grade 2	2014/2013	20/40	Grade 8	2008/2007	20			

Please note that each applicant is assessed on a case-by-case basis, but the Kindergarten placement is based on the year of birth only. Due to the specifics of our student population and the fact that our students come from different educational systems, there are instances where additional criteria are applied. In general, students should be no more than twelve months older or younger than the average age for their grade.
